

Ecology of leadership

Ecology

the relations of things to one another and to their environments

Elements of ecology

- The environment
 - Where does leadership live
- The organism
 - What is the diversity of leadership
 - What type of organism are you
- The relationship
 - Survival of the fittest

Guiding questions

- What situations have you been a leader or seen effective leadership?
- What were the characteristics of the effective leaders?
- Why did leadership fail?
- What have been your experiences as leader?

Goal

- Wildlife health leadership ecology
 - Start with some candidate 'hypothesis' of what is needed or might work in the context of wildlife health
 - Come back to these at the end of the day to refine what is needed for effective wildlife health leadership
